BARIATRIC & SPECIALIST
EQUIPMENT RENTALS

Have you ever wondered what high-quality, dignified bariatric care looks like?

Five, part of the Winncare Group is your number one trusted UK provider for all your bariatric and specialist care needs. We supply a range of bariatric equipment from Beds, Mattresses to Hoists and Air-Assisted Devices for Acute, Community, Long-Term and Home Care settings.

We understand that it is vital for your teams to have timely access to the right equipment - and the knowledge to use it safely.

As the number of plus-size patients admitted to hospital continues to rise, a lack of appropriate bariatric equipment can compromise quality of care, delay recovery and increase patient safety risks.

Five provides both emergency equipment hire - available 24/7/365 with a delivery time of four hours - and long-term equipment solutions. With extensive expertise in bariatric care and safe patient handling, our team ensures every patient receives the equipment they need, and every care team can deliver safe, dignified and comfortable care.

Where are we?

With six strategically located service centres nationwide, we offer same-day or 4-hour delivery on core products, helping you provide the best care without delay. Each service centre holds significant stock across all product groups and includes a repair workshop and full decontamination facilities - ensuring all equipment is cleaned to trust infection-control standards and delivered ready for immediate use by our trained technicians.

Medical Beds - Bariatric Beds

ook snow ALL

The ook snow ALL delivers a complete standardisation solution across medical-surgical, bariatric, and palliative environments. Designed to reduce rental costs and streamline handling, this versatile bed adapts seamlessly to any patient size using one-step Infinite™ width expansion technology while meeting strict safety standards.

Its ultra-low height encourages patient independence, while a unique dual-occupancy certification allows loved ones to stay close during end-of-life care. Powered by Pilot Drive™ for effortless transport and Umano Connect™ for real-time remote monitoring, the ook snow ALL enhances safety and control for healthcare teams.

VersaTech 1100 ULB Bariatric Ultra Low Bed

As the only bariatric bed on the market with a load capacity of 499kg, the VersaTech 1100 aims to deliver a unique solution to the UK hospital and care sector. Able to lower to 210mm (8 inches) from the ground, this bariatric bed not only reduces the risk of falls, it also makes it easier for special needs patients to enter and exit the bed, improving their autonomy.

Equipped with an integrated scale and a bed exit detection system, the VersaTech 1100 will make a huge difference to nurses and users who will benefit from the unique advantages of our ultra-low profile bariatric bed.
